# Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? Import a repository.

Owner *                    Repository name *

ian-curtis ▾    /

Great repository names are short and memorable. Need inspiration? How about upgraded-enigma?

Description (optional)

○ Public
   Anyone on the internet can see this repository. You choose who can commit.

○ Private
   You choose who can see and commit to this repository.

## Initialize this repository with:

Skip this step if you're importing an existing repository.

☐ **Add a README file**
   This is where you can write a long description for your project. Learn more.

## Add .gitignore
